PLANETARY ATMOSPHERIC ELECTRICITY SPACE SCIENCES SERIES OF ISSI

DOWNLOAD

Springer. Hardcover. Book Condition: New. Hardcover. 534 pages. Dimensions: 9.3in. x 6.1in. x 1.0in. Roger-Maurice Bonnet Michel Blanc Originally published in the journal Space Science Reviews, Volume 137, Nos 14. DOI: 10. 1007/s11214-008-9418-0 Springer ScienceBusiness Media B. V. 2008 Planetary Atmospheric Electricity is the rst publication of its kind in the Space Science Series of ISSI. It is the result of a new and successful joint venture between ISSI and Eu- planet. Europlanet is a network of over 110 European and U. S. laboratories deeply involved in the development of planetary sciences and support to the European planetary space exploration programme. In 2004, the Europlanet consortium obtained support from the European Commission to strengthen the planetary science community worldwide, and to amplify the scientific output, impact and visibility of the European space programme, essentially the European Space Agency's Horizon 2000, Cosmic Vision programmes and their successors. Its present contract with the Commission extends from 2005 to 2008, and includes 7 networking activities, including discipline-based working groups covering the main areas of planetary sciences. A new contract with the Commission, presently under negotiation, will extend Europlanet's activities into the period 2009-2012. With the broad community connection made through its Discipline Working Groups and other activities, Europlanet offers an ideal base from which to identify new fields of research for planetary sciences and to stimulate collaborative work among its member laboratories. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
