

Frequency analysis of reference evapotranspiration

Filesize: 7.48 MB

Reviews

The publication is easy in read through better to recognize. It usually will not cost too much. You wont feel monotony at whenever you want of the time (that's what catalogs are for concerning when you question me).

(Rebecca Bechtelar)

FREQUENCY ANALYSIS OF REFERENCE EVAPOTRANSPIRATION

To download **Frequency analysis of reference evapotranspiration** PDF, please refer to the link listed below and download the ebook or get access to other information that are in conjunction with FREQUENCY ANALYSIS OF REFERENCE EVAPOTRANSPIRATION ebook.

LAP Lambert Academic Publishing Mrz 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - The study has been undertaken to determine and evaluate weekly and monthly reference crop evapotranspiration at Akola and Nagpur stations of Vidarbha region. Climatic parameters (Maximum temperature, Minimum temperature, Maximum relative humidity, Minimum relative humidity, Bright sunshine hours, wind speed) for 20 years (1983-2002) were collected from agriculture meteorological observatory of Akola and Nagpur. Mean climatic data of 20 years (1983-2002) on weekly and monthly basis were used to determine reference evapotranspiration (ET_o) by FAO-56 Penman Monteith method (ET_{opm}) accepted as standard method for estimation of ET_o. The frequency analysis has been carried out to select the rate of reference evapotranspiration on probability basis. Commonly used distributions viz. Normal (Gaussian), Log Normal (Log Gaussian), Gamma, Gumbel (Extreme value type I) for maxima & Weibull (Extreme value type III) for maxima were compared for their suitability in fitting the given data. It is found that no single probability distribution was clearly superior in fitting the data for all meteorological weeks & months of both stations. 72 pp. Englisch.
