In recent years, mayors and municipal leaders throughout the United States have confronted increasing problems of community safety. These problems have affected not only urban centers but also small towns and rural municipalities. Many other countries have experienced similar rapid increases in crime that have only begun to decline in the past few years. The response of many governments has been to toughen their legal and justice systems, increasing policing capacities and penalties. Despite these efforts, the social and economic consequences of crime have been enormous: Expenditures on law enforcement have increased tremendously. Criminal sentences have become tougher; The number of offenders prosecuted and incarcerated has risen dramatically; Private security personnel have outstripped official law enforcement; Communities increasingly have resorted to fortifying neighborhoods; Crime has reduced the tax base of cities by driving out residents and businesses. Traditionally, the public has viewed crime reduction as the responsibility of the police and the courts. However, in spite of increased expenditures, these institutions have been unable to contain the epidemic of crime. The result has been a loss of confidence in criminal justice systems and high levels of public concern about crime. Migration, rapid changes in populations, rising poverty levels, and income disparities continue to affect many countries. Crime prevention, rather than reaction or repression, has generally played a very minor role in addressing crime problems. To have an impact on current crime problems and avoid even greater problems in the future, a more balanced approach and perceptual shift by society are necessary. This monograph was prepared for mayors, city managers, planners, and elected officials. It brings together information from around the United States and around the world on ways...
