BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Debate over renewable energy programs is focused on the FY2001 budget request, the Clinton Administrations Climate Change Technology Initiative (CCTI), and proposals for restructuring the electricity industry. Energy security, a major driver of federal energy efficiency programs in the past, is now somewhat less of an issue. On the other hand, worldwide emphasis on environmental problems of air and water pollution and global climate change, and the related development of clean energy technologies in western Europe and Japan especially, have emerged as important influences on renewable energy policymaking. The Clinton Administration views renewable energy as the key part of its energy supply policy, both for environmental and technology competitiveness reasons. The FY2001 request for the Department of Energys (DOEs) Office of Energy Efficiency and Renewable Energys (EEREs) Renewable Energy Programs is 456. 6 million, an increase of 100. 0 million (32) over the FY2000 level. This includes 409. 5 million for DOEs Office of Energy Efficiency and Renewable Energy (EERE), an increase of 100. 0 million, and 47. 1 million for the Office of Science (OS), which is the same as for FY2000. The EERE amount includes 31. 7 million more for biofuels, 18. 0 million more for wind, 16. 1 million more for photovoltaics, 10. 2 million more . . . This item ships from La Vergne, TN. Paperback.
